Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant and Examiner discussed the independent claims of record and Applicant agreed to set forth language further defining the window and source of the detected magnetic fields within the invention. Applicant agreed to file and updated/amended claimset comprising at least these changes to distance the present applicant from the art of record. Sepecific wording was not agreed upon, but a focus was agreed to be directed to the window of time between the hemodynamic response and the magnetic fields sampled were to exclude hemodynamic and metabolic responses entirely.
